4.1 Test individual light.....04

4.2 Test group controls.....04

4.3 Test system ports.....05

5. Manual commissioning..... 05

6. Auto commissioning.....06

1. Register

- This phase is under development.

2. Login Page

- This phase is also under development.

3. Admin

- Administrators support the smooth running of offices by carrying out clerical tasks and projects. As an administrator in the construction industry, you could be organizing project meetings. You'd be typing up documents, responding to business enquiries, drawing up contracts and providing customer service. In admin panel, there are 5 functionalities are described-

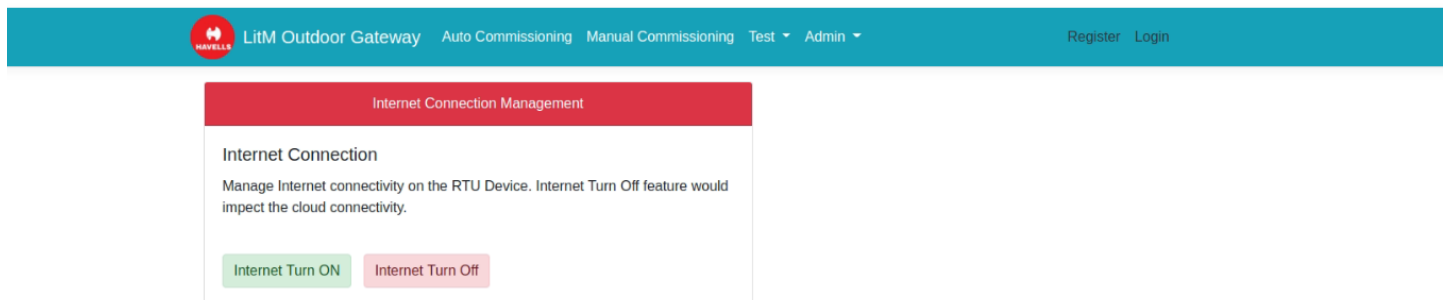

- 3.1 Device disjoining
- 3.2 Send custom Command
- 3.3 Internet connection
- 3.4 Date and time configuration
- 3.5 Gateway configuration

- **3.1 Device disjoining-**

- **3.2 send custom command-**

- **3.3 Internet connection-**

Manage Internet connectivity on the RTU Device. Internet Turn Off feature would impact the cloud connectivity.

3.4 To check RTC:

- Open local RTU application at localhost: 5000 go to admin and then Date Time Configuration

Error.

An error occurred while processing your request.

Request ID: |75b87bcf-49b9d692e2b10233.

Development Mode

Swapping to the **Development** environment displays detailed information about the error that occurred.

The **Development** environment shouldn't be enabled for deployed applications. It can result in displaying sensitive information from exceptions to end users. For local debugging, enable the **Development** environment by setting the **ASPNETCORE_ENVIRONMENT** environment variable to **Development** and restarting the app.

- After opening this page it should prompt for entering of date and time if you receive error it means RTC is not properly working,

The screenshot shows a web browser window with the address bar displaying "192.168.5.1:5000/Configuration/RtcTimeConfiguration". The page title is "EdgeGateway". The navigation menu includes "Home", "Test", "Device Management", "Demo", and "Admin". The main heading is "System DateTime Configuration". Below the heading, there is a section titled "Set DateTime" with a date and time input field showing "07/20/2021 12:34 PM" and a calendar icon. Below the input field are two buttons: "Save" (blue) and "Re-Start" (red). At the bottom, there is a link "Back to Home" in blue.

- Note: also remove dongle and then restart RTU after 10 mins to check whether RTC is functioning properly or not.

3.5 Gateway configuration

The gateway configuration file that is used for connection to ThingsBoard platform instance and enable/disable connectors. This configuration points to ThingsBoard instance thingsboard.cloud and uses memory file storage configured to store maximum of 100,000 records. There are 4 different

connectors active. If you like to use only one of them - just remove all other connectors.

5. Manual commissioning:

- In the lighting industry, the term “commissioning” is often applied to lighting control system activation, or factory start up, in which a manufacturer representative calibrates installed controls as a service.

- It may also be used to describe functional testing. Here commissioning perform manually.

6. Automatic Commissioning-

- The primary goal of commissioning is to ensure a building and its systems meet the owner's project requirements.
- This includes, but is not limited to, the following commissioning goals: To deliver a building or facility that performs according to its design intent and meets the owner's project requirements.

- This type of commissioning perform automatically.
